

DEEPAK KUMAR

Software Engineer At TravClan

☎ 7258940044 ✉ villainraaz92@gmail.com 🔗 LinkedIn 🐙 GitHub 📁 Portfolio 📍 pune, india

PROFESSIONAL SUMMARY

Professional Summary

Results-driven **Software Development Engineer (SDE-1 – Backend)** with experience designing, developing, and maintaining scalable backend systems and RESTful APIs in fast-paced product environments. Proficient in **Node.js, TypeScript, JavaScript, Python, SQL, Express.js, PostgreSQL, MongoDB, Redis, Docker, Git, and AWS**, with a strong understanding of distributed systems, microservices, database design, performance optimization, and system reliability. Experienced in integrating **Generative AI** capabilities into production applications using **Large Language Models (LLMs), AI Agents, Retrieval-Augmented Generation (RAG), prompt engineering, vector databases, MCP, and workflow automation** to build intelligent, business-focused solutions. Passionate about writing clean, maintainable code, solving complex engineering challenges, and delivering secure, high-performance software that scales with business growth.

WORK EXPERIENCE

SDE-1 (Backend) Software Engineer | Full-time

2025 - 2026

TravClan

Remote • New Delhi

- Developed **20+** scalable backend services and RESTful APIs using **Node.js, TypeScript, and Express.js**, supporting multiple business-critical workflows.
- Designed and optimized **10+** PostgreSQL database schemas, improving query efficiency for high-performance applications.
- Integrated **5+ AWS** services to support scalable deployments, infrastructure automation, and application reliability.
- Improved backend performance by optimizing **50+** complex SQL queries and API endpoints using clean architecture principles.
- Built and integrated **15+** AI-powered features using **Large Language Models (LLMs)** and modern Generative AI frameworks.
- Contributed to **30+** production deployments by following clean architecture, modular design, Git-based version control, and engineering best practices.

Technologies / Skills Used : node.js, typescript, javascript, postgresql, express.js, aws, claude code, MongoDB

PROJECTS

AI Sales Operating System | 🐙 Github

Feb 2026 - Present

Lead Developer

- Developed **20+** scalable RESTful APIs using **Node.js, TypeScript, and Express.js** to support multiple business-critical workflows.
- Designed and optimized **10+** PostgreSQL database schemas, improving scalability and maintainability of backend systems.
- Integrated **AWS** cloud services to enable scalable deployments and enhance application reliability.
- Optimized backend APIs and database queries to improve application responsiveness and overall system performance.
- Built and integrated **15+** AI-powered features using **Large Language Models (LLMs)** and modern Generative AI frameworks.
- Contributed to **30+** production deployments while following clean architecture, modular design, Git-based version control, and engineering best practices.

Technologies / Tools Used : Python, FastAPI, LangChain, PostgreSQL, OpenAI API, MongoDB, React

SKILLS

Programming Languages :	SQL, JavaScript, TypeScript, Python
Frameworks & Libraries :	Next.js, React, Express, Node.js, FastAPI, langchain, LangSmith, Langgraph
Tools & Platforms :	Git, GitHub, Docker, Postman, Linux, CI/CD, GitHub Actions, Aws, vscode
Databases :	PostgreSQL, Redis, MongoDB, MySQL, Supabase, DynamoDB
Soft Skills :	Communication, System Design, Debugging, Problem Solving, Decision Making
Languages :	English, Hindi

EDUCATION

Navsahyadri Intitute of technology | pune , india

2020 - 2022

Diploma in computer science

CGPA : 8.1/10

Built a digital population management system as my final-year diploma project to convert physical population records into a centralized digital database, improving data management, accessibility, and efficiency.

IES college of Technology | Bhopal,India

2023 - 2026

B.Tech CSE

CGPA : 75/10

Developed a secure and user-friendly job portal as a [B.Tech](#) project to connect students in Bihar with employment opportunities. Designed an intuitive application process to ensure a seamless user experience while implementing secure authentication, data protection, and efficient job management features.
